**Summary of project**

Group members: Gavin Jin (jj2915), Bernice Feng (bf1318)

Gavin: Mainly responsible for implementing the flask server program. Also help Bernice implement the html templates and relative javascript functions.

Bernice: Mainly responsible for front-end development, including coding the html css and javascript to collect information from users and display information from server.

We work together on designing the sql queries for the database and implementing it in python using stored procedures and prepared statements. We also create triggers, modify foreign key constraints for the flight status.
